When a worker suffers an injury on the job, make **MedCall** Advisors the first step in your care plan. It's a medical call center that immediately connects the worker with a physician Board Certified in Emergency Medicine via app, phone or web browser. The physician assesses and diagnoses the injury and provides detailed instructions for treatment, return to work instructions and any work restrictions. Reduces liability and costs while producing better patient outcomes.

HOW IS MEDCALL DIFFERENT FROM NURSE TRIAGE?

Nurses can't diagnose illness or injury.

Nurses can't prescribe treatment.

Nurse Triage can entail costly 3rd party physicians.

Physician diagnosis reduces liability & assures appropriate care.

MedCall Physicians are Board Certified in Emergency Medicine.

The entire MedCall system was built to HIPAA compliant. Nextiva phone system, technology and video platform, and SFTP portals that data is transmitted through are all HIPAA compliant. The email reports are end to end encrypted via DocuSign. The HIPAA Privacy Rule does not apply to entities that are either workers' compensation insurers, workers' compensation administrative agencies, or employers, except to the extent they may otherwise be covered entities. However, these entities need access to the health information of individuals who are injured on the job or who have a work-related illness to process or adjudicate claims, or to coordinate care under workers' compensation systems. Generally, this health information is obtained from health care providers who treat these individuals and who may be covered by the Privacy Rule. The Privacy Rule recognizes the legitimate need of insurers and other entities involved in the workers' compensation systems to have access to individuals' health information as authorized by State or other law. Due to the significant variability among such laws, the Privacy Rule permits disclosures of health information for workers' compensation purposes in a number of different ways.
