

HOME SAFE

for the **HOLIDAYS**

WHEELS, GRAVITY,
AND COMPLACENCY

WHEELS

We want to help our customers ensure that their employees make it home safely during the holidays by focusing on three key areas:

Wheels, Gravity and Complacency.

Motor Vehicles

One of the most dangerous tasks employees perform every day is often overlooked or underestimated... traveling to and from work and/or jobsites.

- Transportation incidents remain the most frequent type of work-related fatal events accounting for *40% of all work-related fatalities.
- Every *12 seconds someone dies in a car crash.
- In 2018, there were *39,404 motor vehicle-related deaths
- *47% of all fatally-injured in a motor vehicle accident were not wearing seat belts.
- Motor vehicle crashes cost employees *\$60 billion annually.

Mobile/Heavy Equipment

Accidents involving mobile equipment continue to be a leading cause of injury in the construction and mining sectors.

- *23.6% of construction fatalities involved heavy equipment.
- Greater than *52% road construction worker deaths are caused by workers being struck by a vehicle or mobile equipment.
- Nearly half of all U.S. *mining fatalities in recent years were due to accidents involving powered haulage.

Accidents involving motor vehicles and mobile equipment continue to be a leading cause of catastrophic injuries, but that doesn't have to be the case. With a properly managed fleet safety and driver/operator training program, you will greatly reduce your employees' potential of being involved in an accident involving motor vehicles and/or mobile equipment.

Let's work together to help your employees work safely and return
